

# DOUBLE INDUCTION COOKER

**MPM**

MKE-13

## Functions:

- An induction cooker with two heating zones and independent adjustment
- Two independent induction heating zones with a diameter of 190 mm (for utensils with a diameter of 8 to 24 cm)
- Automatic induction cooking utensils detection
- Touch function panel with LED display
- Timer (from 0 to 180 min.) with a function of switching off a particular zone after a selected period of time
- Temperature adjustment range from 60°C to 240°C with accuracy to 20°C
- Power indicator with adjustment range:
  - left heating zone: 200-1800 W
  - right heating zone: 200-1300 W
- Status indicators showing that the appliance is connected to the network
- Sound signal:
  - connection to the network
  - selected functions
  - operation end
- Keypad lock
- Non-slip feet
- Cooker dimensions (width x depth x height): 600 x 370 x 77 mm
- Perfect cooking – safety, lower energy consumption, less waiting, greater reliability.
- Saves time and energy.
- Cold hob for safety.
- Induction cooker – quick and clean cooking with low energy consumption.
- Induction hob cool to touch.
- Saves time (60%) and electric power (50%) when cooking.
- Minimal heat losses (efficiency above 90%).
- High level of safety:
  - switching off automatically after 10 seconds of inactivity
  - sound signalling and switching to standby mode (60 seconds) if a utensil is removed from the heating surface during cooking
  - sound signalling and switching to standby mode (60 seconds) if an inappropriate utensil is used
  - thermal protection from overheating of the heating hob and the interior of the cooker with sound signalling
  - protection from an excessive voltage spike or drop in the power network
  - automatic error detection including error message display – cooling fan controlled by a microprocessor (switches on and off automatically depending on the temperature of the cooker).

## Technical parameters:

- Supply: 220-240V 50/60Hz
- Power: 3100W

EAN:  
5903151002983

Master carton  
quantity: 2 pcs.
